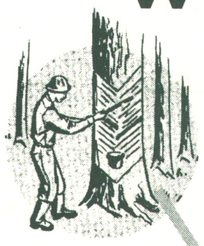
Smokey says:
PREVENT FOREST FIRES!

WHAT WE GET FROM TREES

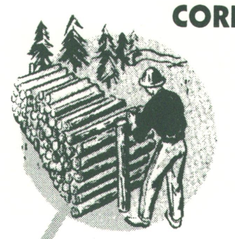


GUMS

- **RESINS**
  - GUM ROSIN — Ceramic enamels, Disinfectants, Drugs, Electrical insulation, Fireworks and explosives, Greases, Leather dressings, Paint driers, Paper sizes, Printing ink, Soaps, Solder flux, Varnishes, Waxes
  - GUM TURPENTINE — Cleaning fluids, Crayons, Explosives, Floor polish, Greases and oils, Insecticides, Laboratory reagents, Paints, varnishes, stains, Shoe polish, Soaps, Synthetic camphor, Waxes, Varnishes, Wood fillers
- STORAX — Adhesives, Chewing gum, Flavoring extracts, Ointments, Perfumes
- HEPTANE — Solvent, Standard for octane rating
- BALSAM — Drugs, Glass cement, Spirit varnishes
- SPRUCE GUM — Chewing gum, Confections, Drugs

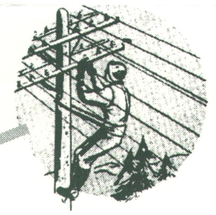
NUTS AND FRUIT

OILS, EXTRACT, DECORATIONS — FOLIAGE



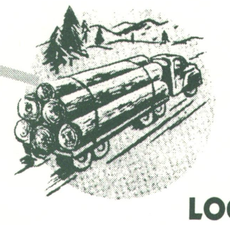
CORDWOOD

- **CHARCOAL**
- **DISTILLATION**
  - HARDWOOD — ACETATE OF LIME, ACETIC ACID, CHARCOAL, TAR, WOOD ALCOHOL, WOOD CREOSOTE
  - SOFTWOODS — OILS
- **DYE**
- **EXCELSIOR**
- **FUEL**
- **PULPWOOD**
- **TANNIN**
- LIGNIN — Plastics, Road building materials, Soil conditioner, Tanning materials, Vanillin
- **CELLULOSE**
  - **CHEMICAL PRODUCTS** — Artificial hair and bristles, Cellophane, Celluloid, Collodion, Explosives, Imitation leather, Molded plastics, Phonograph records, Photo films, Rayon, Sausage cases, Shatterproof glass, Solid alcohol, Sponges, (Hundreds of other articles)
  - **FIBER PRODUCTS**
    - PAPER — Absorbent, Bag, Book, Building, Industrial, Newsprint, Tissue, Wall, Wrapping, Writing
    - PULP AND PAPER PRODUCTS (Thousands of different articles)
    - FIBERBOARD — Boxboard, Hardboard, Insulation board, Wallboard



POLES PILES POSTS

- **BOLTS** — Barrell staves, Handles, Shingles, Shoe findings
- **LUMBER**
  - SHOP AND FACTORY — Boxes, Cabinets, Caskets, Farm implements, Flooring, Furniture, Millwork, Musical instruments, Parquetry, Patterns and flasks, Tanks
  - STRUCTURAL — Heavy joists, Laminated wood, Planks, Sills
  - YARD — Boards, Dimension, Finish
- **RESIDUES** — Bedding for animals, Box shooks, Chemical products, Dowels, Fiber products, Flooring, Floor-sweeping compounds, Fuel, Furniture squares, Industrial alcohol, Insulation, Lath, Moldings, Mop handles, Oxalic acid, Particle board, Stock-feeding yeast
- **TIES**
- **VENEER** — Baskets, Furniture, Plywood



LOGS

STUMPS

- **VENEER**
- **DISTILLATION** — CHARCOAL, PINE OIL, PITCH, TAR OIL, WOOD ROSIN, WOOD TAR, WOOD TURPENTINE
- **SAP** — SYRUP BLEND, SUGAR AND SYRUP
- **BARK** — DRUGS, DYE, OILS, TANNIN
- **ROOTS** — SMOKING PIPES, TEA AND OIL

FORESTS ARE IMPORTANT

Most of the products shown on this chart come from trees that grow on commercial forest land. This land—482 million acres in the United States including Hawaii and Coastal Alaska—is the land upon which we depend for our timber supplies.

Almost three-quarters of our commercial forest land is privately owned. Eighteen percent is in the National Forests. Approximately 9 percent is owned by other Federal, State, and local agencies.

If forest land—both private and public—is well managed, it can provide continuous crops of raw materials for industries and steady jobs for our increasing population. But forests are needed for livestock; to furnish a home for fish and wildlife; to provide hunting, fishing, camping, hiking, and other kinds of outdoor recreation.

Forests are important to all of us.
